

Tips for Parents: Using the Library

Children can learn to use the library even before they start school, and taking your preschooler to the library will help prepare them for an easy adjustment when it comes time to start kindergarten. Help your child take advantage of the many resources offered by your local library.

Most libraries have a large selection of books for children at all reading levels, as well as picture books, books on tape, music CD's, videos for checkout, story times, and fun activities.
